Work Interest: My main area of interest is to work in the field of Managing Natural Resources, Developing Environment and Rural Communities. I aspire to work in these, as they provide adequate challenges, opportunities and experiences to direct basic resources like food, water, and energy under regular and extreme socioeconomic and climatic challenges. I think we all should start focussing on the solutions to fill these gaps. This requires sufficient knowledge, skills and innovativeness towards developing the environment and the deprived communities. At PSI, I am working in Natural Resource Management Group.

Personal Interest: I like to read short story books and magazines. I have a keen interest in watching action movies and Hindi songs. I get disturbed by absolute sycophancy and unequal participation while working. I always search for doing adventures and in managing events.
