

**Arvind Kumar**  
**Member, Technical Team**  
**Home Town: Susuwahi, Varanasi**

**Work Interests:** My work interest lies in using Remote Sensing & GIS technique to solve the spatial problems for the aggregate development. I would like to integrate this technology at grass root level to facilitate the common people to analyze their resources and take effective decision towards their sustainable development.

**Personal interests:** I like playing cricket, workout in gym, cooking, listening songs and reading about sports and new technology. I love to spend some time alone at calm places and watching nature.
